DIMONT Announces Strategic Partnership with OrangeGrid

- Companies to co-host reception for financial institutions from hospitality suite at The Five Star Conference and Expo -

DALLAS, Sept. 1, 2015 – [DIMONT](#), the longest-serving provider of hazard claims insurance processing services to the residential and commercial mortgage industries in the United States, today announced a strategic partnership with Anaheim, Calif.-based OrangeGrid, provider of an Enterprise PaaS application suite empowered by iBPMS (Intelligent Business Process Management Suite) technology that allows businesses to digitize virtually any business process without going through traditional software development life cycles.

This relationship was formed to afford interested housing industry customers the opportunity to access DIMONT's expertise in hazard insurance related issues and its claims processing capabilities through OrangeGrid's innovative technology suite. Among other things, this collaboration will provide customers the flexibility to revise hazard claims procedures and reporting stemming from compliance and other business changes, without resorting to lengthy and expensive IT development cycles. As a result, mortgage investors and servicers who utilize DIMONT's claims processing services will save time and money, and their partnerships with DIMONT in other areas will be enriched by the robust, collaborative OrangeGrid environment.

To introduce the partnership, DIMONT and OrangeGrid will be hosting a joint hospitality suite for their clients and interested mortgage investors and servicers near the exhibit hall at the Five Star Conference and Expo on Sept. 16-18 at the Hilton Anatole in Dallas.

"We're excited to work with OrangeGrid, as together we will provide customers with a faster, easier to use platform for hazard insurance claims processing and a collaborative environment to work together on other insurance-related matters," said Denis Brosnan, president and chief executive officer of DIMONT. "We are thrilled to showcase this strategic alliance at the Five Star Conference and continue working toward our goal of propelling our company into its bright future."
